

# Imprivata Confirm ID for NextGen Enterprise EHR

The fast, secure, and DEA-compliant authentication platform for enabling EPCS within NextGen Enterprise EHR

## Key benefits:

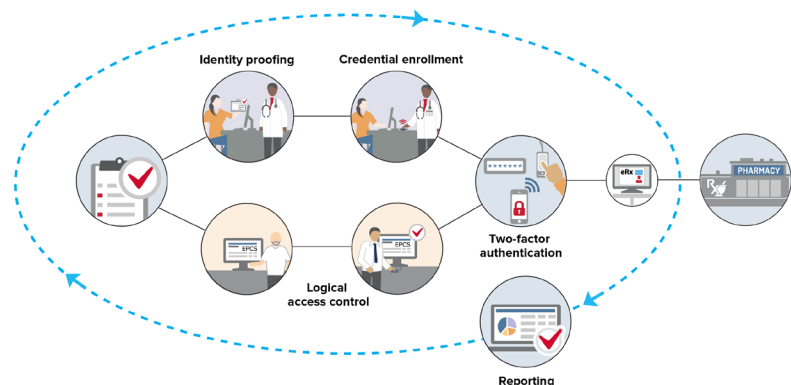

- Ensure compliance with DEA requirements for EPCS with the most comprehensive platform for identity proofing, logical access control, and two-factor authentication
- Simplify EPCS workflows with the broadest range of innovative and convenient authentication methods, including Hands Free Authentication, push token, and fingerprint biometrics
- Streamline order signing through tight integration with the NextGen EPCS workflow and only prompt providers for the authentication methods are available and allowed

Imprivata Confirm ID® is a comprehensive identity and two-factor authentication platform that integrates seamlessly with NextGen® Enterprise EHR to deliver fast, secure, and DEA-compliant authentication for electronic prescribing of controlled substances (EPCS).

Imprivata Confirm ID is an end-to-end solution for meeting the DEA requirements for EPCS, and supports the most comprehensive set of innovative and convenient two-factor authentication methods to give providers a fast and efficient EPCS workflow. This drives adoption of EPCS and helps organizations realize the substantial benefits, including:

- Improving provider productivity by enabling a single, consistent
- Increasing e-prescribing adoption to help meet Meaningful Use criteria
- Enhancing patient satisfaction by reducing wait times at pharmacies and doctor's office visits
- Combatting prescription drug abuse by minimizing the risk of DEA number theft, prescription fraud, and doctor shopping

The DEA allows EPCS only if certain requirements are met and a secure, auditable chain of trust is established for the entire EPCS process. Imprivata Confirm ID creates this chain of trust by simplifying provider identity proofing, enabling supervised enrollment, and enforcing two-factor authentication requirements for prescription signing while maintaining a comprehensive audit trail throughout the entire process.

Imprivata Confirm ID offers the broadest range of convenient and innovative two-factor authentication options that meet DEA requirements for EPCS.

### Streamlined identity proofing, supervised enrollment, and access control

To enable EPCS, the DEA requires confirmation of the identity of all providers authorized to prescribe controlled substances. Imprivata Confirm ID streamlines the identity proofing process by enabling administrators to easily assign specific roles and responsibilities for identity proofing, and implementing and enforcing workflows for the two-person approval processes as mandated by the DEA. Imprivata Confirm ID also allows enrollment of a provider's credentials through a supervised enrollment process. Administrators can assign individuals responsible for supervised enrollment, separating them from individuals in charge of identity proofing (as mandated by the DEA). Because this process is automated, administrators can provide a complete audit trail to demonstrate compliance.

### Fastest, most convenient two-factor authentication

Imprivata Confirm ID offers the broadest range of convenient and innovative two-factor authentication options that meet DEA requirements for EPCS. This includes Hands Free Authentication, a proximity-based solution that wirelessly retrieves and verifies a one-time password (OTP) from a user's mobile device. Imprivata Confirm ID also offers push token notification, fingerprint biometrics, and conventional hardware and software tokens to give providers the flexibility to select the DEA-compliant two-factor authentication options that best fit their workflows.

At the time of prescribing, the user is only prompted for what is available and allowed. For example, if working from home without access to a fingerprint reader, Imprivata Confirm ID for EPCS will prompt the prescriber for other two-factor authentication methods. This built-in flexibility improves efficiency, increases provider satisfaction, and drives EPCS adoption.

Something you are	Something you have						Something you know		
Fingerprint Biometrics	Hands Free Auth	Push Notification	SMS	Soft Token	Hard Token	Proximity Badge	Password	PIN	Q&A
									
✓ DEA Compliant	✓ DEA Compliant	✓ DEA Compliant	✓ DEA Compliant	✓ DEA Compliant	✓ DEA Compliant		✓ DEA Compliant		

### Comprehensive reporting

Imprivata Confirm ID offers detailed reporting capabilities to establish a secure, auditable chain of trust for the entire EPCS process. Imprivata Confirm ID helps organizations demonstrate and prove compliance with DEA and state-level EPCS requirements. Comprehensive reporting tools document the identity proofing, supervised enrollment, and prescription signing processes, including any failed transmissions, unauthorized access attempts, or other potential discrepancies.

## **Imprivata Confirm ID: The comprehensive identity and multifactor authentication platform for healthcare**

Imprivata Confirm ID is a comprehensive identity and two-factor authentication platform for fast, secure authentication workflows across the healthcare enterprise. Imprivata Confirm ID makes security invisible by offering a broad range of innovative, convenient, and DEA-compliant authentication methods, including Hands Free Authentication, push token notification, and fingerprint biometrics. Imprivata Confirm ID combines security and convenience by enabling fast, secure authentication across enterprise workflows while creating a secure, auditable chain of trust wherever, whenever, and however users interact with patient records and other sensitive data.
